Incomplete submittals will be returned to the County for additional information. Sections A and B are to be submitted to State Engineers Office, 1313 Sherman Street, Rm 818, Denver, CO 80203. For Sections C and D: **submit to the Division of Water Resources at 310 E. Abriendo, Ste. B, Pueblo, Colorado 81004.**

- Name of proposed project: \_\_\_\_\_
- Definition of proposed land use action (please select only one below)
- Cluster development as defined by §30-28-403, C.R.S.
    - **Proceed to Section A (Below)**
  - Subdivision as defined by §30-28-136(h)(l), C.R.S.
    - **Proceed to Section B**
  - Land division exempted from statutory subdivision process identified in §30-28-133, C.R.S.
    - **Proceed to Section C**
  - Special use, zoning, or other land use action that does not involve a division of land
    - **Proceed to Section D**

#### Section A – Cluster Development

By March 11, 2011 memorandum from the State Engineer, this office recommended that all Counties forward land use actions that split parcels of land but do not involve the subdivision of land as defined in §30-28-101(10)(a), C.R.S., including cluster developments, for comment in any case where the land has an existing well(s) or permit(s) issued for construction of a well. In such a case, this office will inform the County that upon completion of the cluster development, the existing well owner(s) or permit holder(s) must re-permit the well consistent with a procedure outlined in Section 3, Attachment B of the State Engineer's March 4, 2005 memorandum to all county land use planning directors, and summarized below.

No later than ten days after County approval of a cluster development, the County shall notify this office of such approval and shall provide a copy of the rural land use plan that includes the cluster development. The plan must include **a copy of the survey plat that describes the entire land area associated with the plan, identifies the set aside open space area, and describes the residential lots within the land area.** Additionally, the plan should include limitations imposed on water usage for each lot and for the development as a whole sufficient to demonstrate that usage in the development does not exceed one acre-foot of annual withdrawal for each full 35 acres in within the development. For example, a cluster development with seven lots on 150 acres contains four full 35-acre parcels. Therefore, four acre-feet annually is available to the lots in the development and split evenly among the seven lots, four acre-feet allows for 0.57 acre-feet annually per lot.
