In order begin the review process of a Construction Stormwater Permit, Pueblo County requires the following be submitted:

- Completed Application for Stormwater Construction Discharge Permit
- Completed O & M Manual
- Completed PSCM Review Checklist for Submittals or Exclusions
- Completed Stormwater Packet Checklist
- Proposed stormwater plan for the site
- Copy of the approval from the Colorado Department of Public Health and Environment (CDPHE) for their application

The submittal can be made prior to receipt of approval from CDPHE, but will not receive final approval from Pueblo County until that document is submitted together with the access permit application and excavation permit (if required for the project). Pueblo County will review the plan and if deemed adequate, will issue a letter of approval of the Pueblo County Stormwater Permit.

**Please note that any major changes or modifications (i.e. hydrology changes) to the SWMP after approval by Pueblo County may result in the need for a new application to be filed.**
