Re: PACOG 2045 Long Range Transportation Plan Draft Goals, Performance Measures and Targets

The Pueblo Area Council of Governments (PACOG), as the MPO for the region, is tasked with completing a Long Range Transportation Plan (LRTP) at regular five-year intervals. A new 2045 Long Range Transportation Plan, the *PACOG Moves the Region 2045 LRTP*, is under development supported by a consultant team led by Wilson & Company.

As a foundation for the 2045 LRTP, the consultant team has developed a draft set of goals, performance measures and targets that will provide a foundation for transportation planning in the Pueblo Region. The attached draft 2045 LRTP goals, performance measures and targets are based on the goals, performance measures and targets that were adopted by PACOG for the current 2040 LRTP. The updated goals, performance measures and targets are consistent with priorities that have been established by the 2045 Statewide Transportation Plan.

Please let us hear from you regarding how we might improve upon the proposed 2045 LRTP goals, performance measures and targets. Your input will be incorporated into a revised draft version of the goals, performance measures and targets that will be posted online in survey format for public comment. We are not asking for formal approval of the goals, performance measures and targets at this time; rather, you will be asked to officially approve a final version after the public outreach effort is complete.

While we understand that Covid-19 has consumed significant resources in Pueblo County and beyond, PACOG is moving forward strongly to complete the plan and fulfill our state and federal requirements. We would appreciate any comments to the goals, performance measures and targets by Friday, May 22, 2020.

Thank you in advance for your participation and support for development of the 2045 LRTP.

Sincerely,

Maureen Paz de Araujo, Senior Transportation Planner
Wilson & Company
