

## **Board of Health AGENDA**

**NOTICE REGARDING COVID-19 (Novel Coronavirus):** To adhere to COVID-19 social distancing precautions, all on-site public Board of Health meetings are postponed until further notice. To allow access to this meeting, and future Board of Health meetings, call 719-583-4513 for more information. The public may make any public comments by email to Executive Assistant Ramona Chisman-Ewing, at [mona.ewing@pueblocounty.us](mailto:mona.ewing@pueblocounty.us).

The Board of Health meeting will be held **Wednesday, September 22, 2021, at 12:00 noon by Zoom.**

- A. 12:00 - 12:03 p.m. – Call to Order and Approval / Changes to Agenda (**Action Required**)
- B. 12:03 - 12:05 p.m. – Approval of Board of Health Meeting Minutes held **August 25, 2021 (Action Required)**
- C. 12:05 – 12:15 p.m. – **Public Forum**
- D. 12:15 -12:25 p.m. - **COVID Updates** - Randy Evetts
- E. 12:25 – 12:40 p.m. – **Special Presentation: 2020 Audit Report** – Osborne, Parsons & Rosacker, LLP – Mitch Downs and Dustin Mueller (**Action Required**)
- F. 12:40-1:00 p.m. – **Action Items**
  - Pay Scale Adjustment- Randy Evetts
  - Monthly Financial Reports: July and August – Georgia Alfonso
  - Contracts – Georgia Alfonso
- G. 1:00-1:15 p.m. – **BOH Updates/ Reports**
  - Public Health Director Report – Randy Evetts
  - November and December BOH Meeting Dates – Randy Evetts
- H. 1:15 -1:20 p.m. – **Unfinished Business**
- I. 1:20 p.m-1:25 p.m. – **New Business**

**ADJOURN**

The Board of Health meeting was held by Zoom August 25, 2021, at 12:00 noon.

**Board Members**

**Present:** Donald Moore, Board President  
 Michael J. Nerenberg, Board Vice President  
 Garrison Ortiz, County Commissioner  
 Ed Brown, City Council Member  
 Eileen Dennis, Board Member

**Legal Counsel:** Marci Day, Assistant County Attorney

**Administrative Staff**

**Members Present:** Randy Evetts, Public Health Director  
 Katie Davis, Deputy Director  
 Georgia Alfonso, Budget and Finance Director  
 Jody Carrillo, Environmental Health and Emergency Preparedness Division Director  
 Denise DeNardo, Human Resources  
 Ramona Chisman-Ewing, Executive Assistant

**Medical Officer:** Christopher Urbina, MD

**Staff Members:** Vicki Carlton, Shylo Dennison, Sarah Joseph, Aaron Martinez, Sarah Martinez, Alicia Solis, Dee Speier, Kim Sugar, Zak Van Ooyen, Chad Wolgram,

**Guests:** Heather Willard, *The Pueblo Chieftain*, Jack Heeke, *KKTV*, Matthew Baker, Ken Gennetta, Joy Lundquist, and Gunnison Pagnotta, (Zoom list of attendees attached)

A. **Call to Order and Approve or Make Changes to the Agenda**

Board President, Donald Moore, called the meeting to order and asked for approval of the Agenda.

**MOVED** by Garrison Ortiz, seconded by Eileen Dennis, to approve the Agenda.

**MOTION CARRIED UNANIMOUSLY**

B. **Approval of Minutes**

**MOVED** by Michael Nerenberg, seconded by Ed Brown, to approve the July 28, 2021, BOH meeting minutes as submitted.

**MOTION CARRIED UNANIMOUSLY**

C. **Public Forum**

The following people presented during public forum:

Name	Topic of Discussion
Matthew Baker	COVID-19 mask and vaccine requirements for public schools
<p><b>Comments:</b> Matthew has been tracking the corona virus and taking no chances wherever possible, and little chances if necessary, in order to prevent COVID from entering his home whatsoever. He is happy to say he has been successful. No one in his family has contracted the corona virus. As soon as vaccines became available, he, his wife, and his teenage daughter received their vaccination. He understands even someone who is vaccinated can contract a variant or alpha strain of the corona virus. The vaccine is not 100 percent fool proof. Masks are the best solution for preventing spread. He and his wife were hoping students would be required to wear a mask to attend in person. As soon as they heard masks would only be a recommendation and not a requirement, they unenrolled their children and his daughter is attending an on-line school. He thinks attendance in person would be a better option for her for socialization and assistance from an in-person teacher. If masks are only a recommendation, students won't wear them; statistically that has been shown to be far less safe. Matthew is asking the BOH to make it (masks) a requirement for schools. If the BOH is unwilling to meet in person, why should we ask any more from our children; they should have the same kind of protection.</p>	

Name	Topic of Discussion
Ken Gennetta	Dangers of face masks for children
<p><b>Comments:</b> I have done a lot of research myself and worry about children receiving oxygen while wearing masks; kids need to be able to breathe; their brains are affected from lack of oxygen. They need more oxygen because they have a more active immune system. It is child abuse to force children to wear a mask. If a parent wants a child to wear a mask, that's their option. Masks are unhealthy physically, physiologically, and emotionally to children. Teachers need to see facial expressions of children both ways; kids need to see the teachers, teachers need to see the kids. There's no scientific justification and no evidence that masks stop the spread of viral infections. Ken stated there have been 14 randomized controlled studies showing masks are useless or counterproductive. He quoted Dr. Fauci stating in March 2020, "typical masks are not effective." Masks are a charade for a number of reasons. He also stated a University of Kentucky study showed masks tested from children showed urine, feces, and even strep. He also stated a New York dentist's study states kids are getting cavities from wearing masks; they are self-contaminated, causes bacterial pneumonia, immune suppression, and has caused germaphobia, and irrational fear for kids, and actually caused OCD. Masks, if you look at the box, even contain toxic materials and they are unsanitary. I would say people involved in a Health Department need to be aware and know the difference between pseudoscience and real science and use common sense.</p>	
Name	Topic of Discussion
Joy Lundquist	Health Department's role in schools COVID response
<p><b>Comments:</b> Joy acknowledged the weight of the responsibility of the Board that came in 2020. A new virus came with so many unknowns. Joy stated there were many conflicting concerns of public safety and education, and personal freedom. Joy stated, we know there are and will be mutations of the virus; to date, no vaccine has provided total immunity. This virus took far fewer children's lives in the last seventeen months then the flu took in the previous flu seasons. Pueblo County to date, we have had zero child deaths due to COVID. We know nationwide, children have less than .03% chance of death from COVID-19. The American Academy of Pediatrics says that evidence indicates children are far less likely to become severely ill and spread the infection to others. The Director of Emergency Medical Medicine and Infection Disease Management of Boston Medical Center affirmed there are real downsides to masking children for this long with no known end date and without any clear upside. She is not aware of any studies that show conclusively that kids wearing masks in school has any effect on their own morbidity, mortality, or on the hospitalization, or death rate in the community around them. Layered mitigation failed our kids in 2020; children's education was severely hindered. What we know dictates that we learn how to live with this virus. Our children should not be expected to protect our community from COVID-19, when they are in fact the least likely to contract and spread it. My recommendations are to abandon quarantine kids for potential exposure that hinders their education more than it hinders the spread of the virus. Please don't promise if they just do this one thing, like masking, we will soon be rid of the virus. Empower and support teachers and administrators to educate students free of restrictions. Give as much weight to the mental health and wellbeing of our students, as to their physical health wellbeing. Affirm that parents have the right to choose when it comes to masks, vaccines, or voluntary quarantine. We are not where we were March 2020, we know more, and we have figured out how to return to normal in other facets of life. We cannot justify taking a child away from their education while nearly every other form of public interaction is being practiced uninhibited.</p>	
Name	Topic of Discussion
Gunnison Pagnotta	Social and emotional (mental) health of Pueblo County residents
<p><b>Comments:</b> My concern is the social and emotional wellbeing of the people of Pueblo County of every age, and especially as it relates to many of the knee-jerk reaction to COVID-19 that we have all witnessed in our county, state, and our nation. My fear is that very soon, there will be another of the same type of reaction, possibly even at this meeting. It's my sincere belief that if mental health, or social, emotional, wellbeing was put on a scale of 1-10, with 10 being perfect, that the people with excellent mental health (8, 9, or 10) prepandemic, dropped into the 5, 6, 7 range. This drop was attributed to many knee-jerk reactions of closing down almost literally everything. Folks with mental health of 5, 6, 7 dropped to a 2, 3, 4 level and sunk into a deep depression, which they undoubtedly treated with depressants including liquor and pot. The 2, 3, and 4 group dropped into total despair, including clinical depression, homelessness, violent action, for example shooting innocent people in King Soopers. While the county, state, and national health agencies very closely addressed physical aspects of this virus, unnecessarily especially when it comes to our school</p>	

population of 4 to 18 yr. olds and our staff 24 to 60 yr. olds, truly we have created a new and far more dangerous pandemic. A pandemic of hopelessness, despair, fear, depression, suicidal thinking, and violent outlashing. Unfortunately, the social, emotional aspects of masking, quarantining, business closures, etc. were entirely ignored, while the physical was closely paid attention to. Please learn from the recent past, and at least consider these following suggestions: treat corona virus how you would treat the flu; closely consider the ramifications (ripple effects) of your decisions long before you make them; take into account all aspects of health, not just the physical. Do not under any circumstances and for any reason try to justify taking away god given and constitutional right and freedoms of Americans, especially those Americans who pay your salaries; we the taxpayers. Thank you for your time, all of your efforts, and please consider what I've said and feel free to reach out. I would love to talk to any and all of you if the opportunity arises. Have a great meeting.

D. **School Mask Requirements**

Public Health Director Randy Evetts presented to the Board several email communications received from Pueblo County residents both for and against a mask mandate and what the community is asking and saying. Randy stated currently COVID-19 cases are increasing in the community again, largely due to the Delta variant, which is about 99 percent of the cases currently across the state. Pueblo's seven-day case incident is at 139.2 cases per 100,000 with a seven-day positivity rate of 4.3 percent.

- Hospitalizations have increased from 30 to 35 patients from a low in the high teens about six weeks ago
- Six confirmed COVID related deaths in August
- 52.4% of Pueblo County residents are fully vaccinated
- Almost 60% have received at least one dose
- 27% of teens 12 to 18 yrs. old are fully vaccinated
- Vaccines have not been approved for children under age 12

Due to the concerns of the Delta variant, and what is being seen across the country, the CDC has recommended universal indoor masking for all teachers, staff, students, and visitors to K-12 schools regardless of their vaccination status. CDPHE advised schools to implement the CDC guidance, but has not implemented mandates.

- August PDPHE issued a letter advising schools to implement CDC guidance to protect their students, families, and staff members
- August 17, 2021, Governor Polis also urged the school districts directly to implement mask requirements for their schools
- Currently, no local school districts have implemented mask requirements; however, Dolores Huerta Preparatory Academy has implemented mask requirements beginning yesterday, August 24, 2021

Randy then shared both pros and cons of a mask mandate to the Board.

Pros:

- Provides schools with evidence-based intervention to maintain in person instruction and extracurricular activities
- Reduces the number of students who will be quarantined if there is an exposure
- Reduces the transmission of the virus and lowers the risk of hospitalizations and deaths
- Reduces the disruptions to academic environment
- Reduces social and emotional isolation created when students are forced to work at home
- Lowers the risk of further restrictions and mandates in our community
- Creates uniformity of policy across the schools in Pueblo County

Cons:

- Public health does not have the capacity to enforce a mandate, and must rely on school's voluntary compliance
- Lack of enforcement capacity may undermine the ability of public health to effectively implement additional orders that may be needed to contain COVID challenges in the future
- This mask only strategy is a narrow strategy and does not address the rest of the community or the layered mitigation strategy for schools that happened last year with data that did make a difference
- Imposes a requirement on parents that believe a mask mandate is unnecessary and heightens community division

Randy stated there has been discussion with the school superintendents of District #60 and #70, who are committed to enforcing a mandate if it's put into place, but they do not believe it is the school's responsibility at this time to put a mandate into place. Randy also acknowledged masking in concert with other layering mitigation strategies has shown to be effective in reducing COVID transmission in schools.

Randy asked for PDPHE's Medical Officer's recommendation. Dr. Urbina highlighted his written recommendation for the Board of Health. He strongly recommends a requirement for universal indoor facial coverings for all students, visitors, and staff members in early child centers and schools K-12 regardless of vaccination status. He stated the goal is to keep children healthy and in school where they can thrive and learn. He also said it is important to not only keep kids in school, but also keep our community open for business. The American Academy of Pediatrics called for universal masking among all individuals within school setting, in order to prioritize in-person learning. The American Academy of Family Practice strongly recommends following CDC guidelines for facial coverings in schools. Dr. Urbina stated even though school has only been in session for a week, there are now over seven schools with at least one case, and multiple children in quarantine. He stated it's clear the voluntary recommendation for schools to have students wear masks, didn't work; kids aren't wearing masks. The nature of the new Delta variant has changed the situation, as the Delta variant is highly contagious; twice as contagious as previous variants. This could cause more severe illness than previous strains in unvaccinated individuals. Dr. Urbina stated masks do work, but they have to be part of the entire layered protection implemented in the schools such as increased ventilation and keeping sick children home; masks alone are not effective, but add an important layer.

Randy stated he is completely aligned with Dr. Urbina's recommendations, but he is also concerned about the practicality and effectiveness of implementing a mandate. He is also concerned about PDPHE's ability to enforce such a mandate. He noted enforcing this mandate will be a distraction from the other responsibilities associated with COVID-19, and public health work in general. He would like to find a more collaborative approach to working with the schools. Without the enforcement piece, implementation is ineffective. Since the summer of 2021, vaccine has been available for children 12 and older, but parents, students, and some teachers have chosen not to take advantage of the vaccine or wear masks. Board President Donald Moore restated both recommendations agree with the science of layered mitigation strategies but differed on implementation of a mandate. He appreciated the collaborative effort to present a comprehensive picture to the Board. The recommendations were as follows: :

- Director Evetts recommended no mandate, but to continue to strongly advise schools to implement CDC guidance to the best of their ability. PDPHE will continue to provide technical support to schools as they implement the guidance.
- Dr. Urbina recommended a universal indoor mask mandate for all students age 2 and older and staff members in early childhood centers and schools.

Donald Moore invited Board members to ask informational and clarifying questions from both Randy and Dr. Urbina to decide possible action of the Board.

- Garrison Ortiz: No questions at this time; sincerely appreciates all of the information that was thoroughly collated for the BOH.
- Dr. Nerenberg: Any numbers on children under 12 with the Delta Variant and the number getting seriously ill? Randy stated he did not have specific numbers at this time, but numbers are going up for all age groups across the state including 6-11 yrs. old. Dr. Urbina stated cases are still small, as far as young children in Pueblo. There are children presenting in Colorado with Multisystem Inflammatory Syndrome associated with COVID-19; currently there are no cases in Pueblo County. Children, however, can infect adults who are unvaccinated. He believes in prevention before things happen.
- Eileen Dennis: What percentage of hospitalized patients are COVID-19 and are hospitals close to capacity? Randy stated Parkview currently had 35 COVID patients. However, they are near capacity because of COVID and other illnesses and trauma. Transfers are also not being accepted at this time from the region. There has also been an increase in RSV (Respiratory Syncytial Virus) across the state, which is taking up pediatric beds across the state. Currently, hospitals are not cutting back on elective procedures.
- Ed Brown: Appreciates Dr. Urbina's recommendations, but he doesn't think the general public

will follow it. At this time, he recommends following Randy's recommendation.

- Donald Moore: What is the risk to the community at large if children are not masked in the schools? Dr. Urbina stated trials are being conducted now; cases are starting to increase and being brought into the schools where unvaccinated children can contact the transmission. He stated the challenge is masks do work in combination with other layers of protection. Donald also asked why Dr. Urbina recommends universal masking instead of a more targeted population, such as the unvaccinated? Dr. Urbina stated because there are a significant number of children who remain unvaccinated. Masking protects vaccinated and unvaccinated people from transmission, along with other layering protection. Will masking reduce quarantining? Dr. Urbina stated yes, masks and other layering of protection, will reduce quarantine. Donald asked how will it be known if the mask requirement is working? Dr. Urbina recommended tracking the seven-day average incidents of cases per 100,000 for a consecutive period of time, possibly 10-14 days or longer, to see a decline and know if masking is effective. Donald stated the draft public health order, regarding masks, is very comprehensive, He asked Randy if he had any discussion with superintendents about the potential for a public health order and the school's ability and/or willingness to enforce such an order. Randy stated there has been discussion about concerns for enforcement and the burden of enforcement for the schools. Superintendents have indicated if a mandate is put into place, they will do their best to enforce it. Enforcement is already in place for dress code, and other vaccine requirements, etc. Donald also asked if the Superintendents understand the Health Department does not have a budget, or staff members, to be part of their enforcement protocol or regime? Randy replied yes, he believes they do. Donald also asked Dr. Urbina a common question is what good are masks in schools if students leave school and are then exposed to large unmasked environments? Dr. Urbina stated now, students are required (by federal law) to ride a school bus, or public transportation, with a mask on. Currently, when they get to school, they take them off. This on and off system does not create a culture where students wear a mask at any indoor setting. He always recommends all people wear a mask in any indoor setting, not just at schools. He also emphasized the importance for every eligible person to get vaccinated.

Garrison Ortiz stated he is in support of Randy's recommendation. He also stated he believes vaccinations and masks are two of the most highly effective tools that are available to curb the virus. He stated the Board of Health, when it exercises hard mandates, needs to ensure there is a good return on investment for public health. The more authority that is exercised now; the less there will be in the future; the Board's authority is not infinite. He stated partnerships and cooperation will be needed in the future. He noted many public and private entities are stepping up and to make their own decisions regarding vaccinations and masks, as appropriate for them. Garrison believes mandates should only be made as a last resort and when it is congruent across the community, in addition to providing the Health Department with necessary resources to enforce such a mandate; which isn't on the table today. He stated the Board needs to be wise and strategic about the authority it possesses; for this reason, he supports Randy's recommendation and not the mandate at this time.

Eileen Dennis said she also leans towards Randy's recommendation for some of the reason's stated by Garrison above. She also said the Board needs to help people understand prevention is going to get the community so much further instead of waiting until the hospitals are overwhelmed and people start dying. She doesn't want children and people to die. Public health is all about prevention. It is important for the whole community to understand and not put the burden just on the children; the whole community needs to understand the need for prevention and the importance of vaccinations.

Michael Nerenberg agrees with Dr. Urbina's recommendation. He stated a lot has been said about parents wanting to make the decision for their own children; he finds it disingenuous as they are making the decision for all of the kids in the school, not just their own. This includes the children with diabetes, obesity, and compromised health. Kids can be masked and go to school or not wear a mask and stay home. It is expected the masked kids should stay home, since they are the ones in fear (of contracting the virus); he disagrees with this sentiment. As far as enforcement, schools now enforce dress codes, what is the difference? Masks can be part of the dress code; it is enforced, so schools can enforce this. Lastly, prevention is easier than treatment; there are already places where it is out of control; he would rather not wait until it is out of control before we (the Board) starts acting. The difference between schools and businesses is kids are required to go to school; no one is required to go into a business.

Dr. Urbina stated people ask for advice and what they need to do; if the mandate is 'voluntary,' essentially the schools will continue to be overwhelmed. CDC recommends isolation and quarantine for positive contacts, so hundreds of students will fall into that category and schools and classrooms will be closed in the near future because of the lack of mitigation, as protocols were 'voluntarily' instituted now. He is also worried about the schools facing significant potential infections because of the lack of help from the Board of Health to mandate masks universally. Flu and RSV season will also challenge children's attendance in school in the near future.

Donald Moore said it is important to keep the community and schools open, and to keep kids in attendance. Masks have been shown to reduce the risk of transmission. He is also sympathetic to children who have severe health conditions, but are required to go to school. Public health has a role to protect the most vulnerable in our community, even at the expense of the inconvenience of the majority. He is not in favor of the Director Evetts' recommendation; he will take the schools at their word to do their best to enforce a mask requirement in the schools.

Donald asked if there is a motion to accept the Public Health Director's recommendation to strongly advise schools to implement CDC guidance to the best of their ability, and PDPHE provide on-going technical support to implement the guidance.

**MOVED** by Garrison Ortiz, seconded by Ed Brown, to accept the Public Health Director's recommendation as stated above and forego a mask mandate.

Donald Moore – No  
Ed Brown – Yes  
Eileen Dennis – No  
Garrison Ortiz – Yes  
Michael Nerenberg – No

***MOTION FAILED***

Michael Nerenberg made a motion to accept Dr. Urbina recommendation of a public health mask mandate to require universal masking indoors for all schools to include all students age 2 and older and all school staff members.

A draft public health order pertaining to a mask mandate was also given to the Board. Board attorney Marci Day suggests not adopting the draft public health order today, in case there any changes to the document the Board would like to have made. Donald Moore also commented it would be beneficial for Randy Evetts, Dr. Urbina, and any necessary staff members, to have a consultation with school superintendents to develop a public health mask order and execute it in good faith on behalf of the majority of the Board's desire. To clarify Michael Nerenberg's motion above, Marci Day asked that he withdraw his original motion and restate it. Dr. Nerenberg withdrew his initial motion and restated a new motion.

**MOVED** by Michael Nerenberg, seconded by Ed Brown, to authorize Public Health Director Randy Evetts, within the guidelines of the draft public health order, to require facial coverings indoors for all individuals aged 2 and older in childcare facilities, youth camps, and PK-12 school settings.

Donald Moore – Yes  
Ed Brown – Yes  
Eileen Dennis – Yes  
Garrison Ortiz – No  
Michael Nerenberg – Yes

***MOTION CARRIED***

E. **Special Presentation**

Community Health Assessment (CHA) Update – due to time constraints, this presentation will be emailed to the Board for review.

F. **Financial and Contract Cost Reports**

**CONTRACTS:**

**Congenital Syphilis Elimination Grant** **8/15/2021 – 7/31/2022** **\$120,716**

This is a program between CDPHE and PDPHE. This project serves to prevent new cases of congenital syphilis by screening, identifying, and treating syphilis in persons of reproductive age. In partnership with the Pueblo Detention Center, PDPHE will implement a program to automate syphilis screenings when a person of reproductive age presents to the facility for intake. In addition to automated screening, PDPHE will also provide field-delivered therapy to persons of reproductive age residing in Pueblo County who are unable to access treatment in a clinical setting. The project seeks to increase early identification of syphilis, access to treatment and referrals, linkage to prenatal care services, which will reduce the risk and burden of syphilis transmission between mother and child. This project is being funded to address the increasing rates of congenital syphilis in Colorado.

PDPHE is asking the Board of Health to approve this program prior to receiving the final contract from CDPHE; the Scope of Work and budget have been finalized. PDPHE is waiting on the contract from CDPHE. Once the contract is received, it will be sent to legal for review. PDPHE would request the Board to authorized Public Health Director Randy Evetts to electronically sign the contract once it has been reviewed and agreed upon. PDPHE would like to begin work on this project as soon as possible. The program requires 1 EFT and an individual has been identified to perform the Scope of Work.

**MOVED** by Michael Nerenberg, seconded by Eileen Dennis, to accept the above contract as presented pending legal review.

***MOTION CARRIED UNANIMOUSLY***

**Information only; no BOH action required:**

**CARES Pueblo County** **7/1/2021 – 12/30/2021** **\$2,000,000**

This is a contract between the County of Pueblo and PDPHE. This funding is to provide resources to support efforts in responding to the Pandemic. It was identified in 2021 that a contract had not been entered into by Pueblo County and PDPHE. PDPHE's auditors requested a contract to identify the terms of the distribution of funds and the contractual relationship of the parties. Since approximately \$1,500,000 of the funds had been expensed in 2020 and the agreement needed to be executed for the audit. Public Health Director Randy Evetts and Board of Health President, Donald Moore discussed the contract. Board President Donald Moore determined since the Board adopted a budget revision in 2020 for \$1,500,000 of the funds, Public Health Director Randy Evetts could sign the contract to meet the needs of the audit.

The next regular BOH meeting is scheduled for Wednesday, September 22, 2021, at 12:00 noon by Zoom.

**MOVED** by Garrison Ortiz, seconded by Ed Brown, to adjourn the Board of Health meeting.

***MOTION CARRIED UNANIMOUSLY***

Donald Moore, Board of Health President

Randy Evetts, MPA, Public Health Director
