**Find a different location near you: [covid19.colorado.gov/testing](https://covid19.colorado.gov/testing)**  
 Other testing sites such as urgent cares and private physicians may have a fee associated with the test.

## When to Quarantine:

After exposure to COVID-19, stay home and away from others for at least 5 days. On day 5, get tested even if you don't develop symptoms. After 5 days continue to wear a mask for 5 days around others and monitor symptoms. If your test is positive, follow isolation guidelines. If you are vaccinated or had confirmed COVID-19 within the last 90 days, you do not need to quarantine.

## When to Isolate:

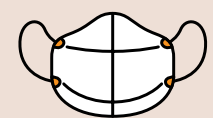

If you tested positive for COVID-19 or have symptoms, stay home and isolate yourself from others for at least 5 days. End isolation if you are fever-free for 24 hours without medication and symptoms are improving. Continue to wear a mask around others for days 6-10. Severe illness should isolate for 10 days.

## When to Wear a Mask:

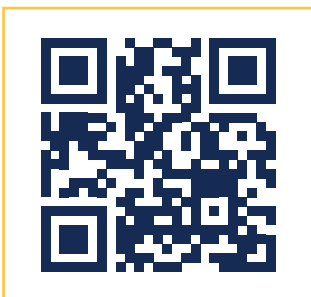

Wear a surgical or KN95/N95 mask (no cloth masks) that fits over nose and mouth around others in your home when quarantining and isolating. Continue to wear a mask for a total of 10 days around others.

Surgical Mask

KN95/N95 Mask
